DISCOVERING A NEW VMS DISTRICT IN CHIBOUGAMAU, QUEBEC

TSXV: **AUME**

FORWARD LOOKING STATEMENTS

WE ARE IN THE MINERAL EXPLORATION AND DEVELOPMENT BUSINESS. IT IS INHERENTLY RISKY, AND ALL INVESTORS SHOULD BE KEENLY AWARE OF THIS

This presentation contains forward-looking statements and forward-looking information (collectively referred to herein as “forward-looking statements”) within the meaning of applicable securities laws. All statements, other than statements of present or historical fact are forward-looking statements. Forward-looking statements are often, but not always, identifiable by use of words such as “may”, “will”, “could”, “should”, “can”, “continue”, “expect”, “anticipate”, “estimate”, “believe”, “intend”, “plan”, “grow”, “strategy” or “project” or the negative of these words or other variations on these words or comparable terminology or similar words suggesting future outcomes. In particular, this presentation contains forward looking statements relating to strategic plans along with other activities, events or developments that Auriginal Metals Inc. (“**Auriginal**”) believes, expects or anticipates will or may occur in the future (including, without limitation, statements regarding the estimation of mineral resources, exploration results, potential mineralization, potential mineral resources and mineral reserves). The forward-looking statements regarding Auriginal are based on certain key expectations and assumptions of Auriginal concerning production and prices, business prospects, strategies, mineral reserves and mineral resources, anticipated grades, recovery rates, regulatory developments, exchange rates, commodity prices, tax laws, the sufficiency of budgeted expenditures in carrying out planned activities, the availability and cost of labour and services and the ability to obtain financing on acceptable terms and the actual results of exploratory activity being equivalent to or better than estimated results, all of which are subject to change based on market conditions and potential timing delays. Although management of Auriginal consider these assumptions to be reasonable based on information currently available to them, they are inherently subject to significant business, economic and competitive uncertainties, and contingencies and may prove to be incorrect.

By their very nature, forward-looking statements involve inherent risks and uncertainties (both general and specific) and risks that forward-looking statements will not be achieved. Undue reliance should not be placed on forward-looking statements, as a number of important factors could cause the actual results to differ materially from the beliefs, plans, objectives, expectations and anticipations, estimates and intentions expressed in the forward-looking statements, including among other things inability to meet current and future obligations; inability to implement Auriginal’s business strategy effectively; general economic and market factors, including business competition, changes in government regulations; volatility in the market prices; failure to establish estimated mineral resources; the possibility that future exploration results will not be consistent with Auriginal’s expectations; the actual results of exploration, development and operational activities; engineering, technical and processing problems; liabilities and risks, including engineering liabilities and risks; changes in project parameters as plans continue to be refined; access to capital markets; interest and currency exchange rates; technological developments; general political and social uncertainties; lack of insurance; delay or failure to receive regulatory approvals, including necessary permits and licenses; changes in legislation; timing and availability of external financing on acceptable terms; and lack of qualified, skilled labour or loss of key individuals. Readers are cautioned that the foregoing list is not exhaustive.

Any forward-looking statement speaks only as of the date on which it is made. Auriginal disclaims any intention or obligation to update or revise any forward looking statements and future oriented financial information contained in this Presentation, whether as a result of new information, future events or otherwise, unless required pursuant to applicable law. Readers are cautioned that the forward looking statements and future oriented financial information contained in this Presentation should not be used for purposes other than for which it is disclosed herein. Readers are cautioned that reliance on such information may not be appropriate for other purposes.

All currency numbers are in $CAD unless otherwise stated.

QP STATEMENT

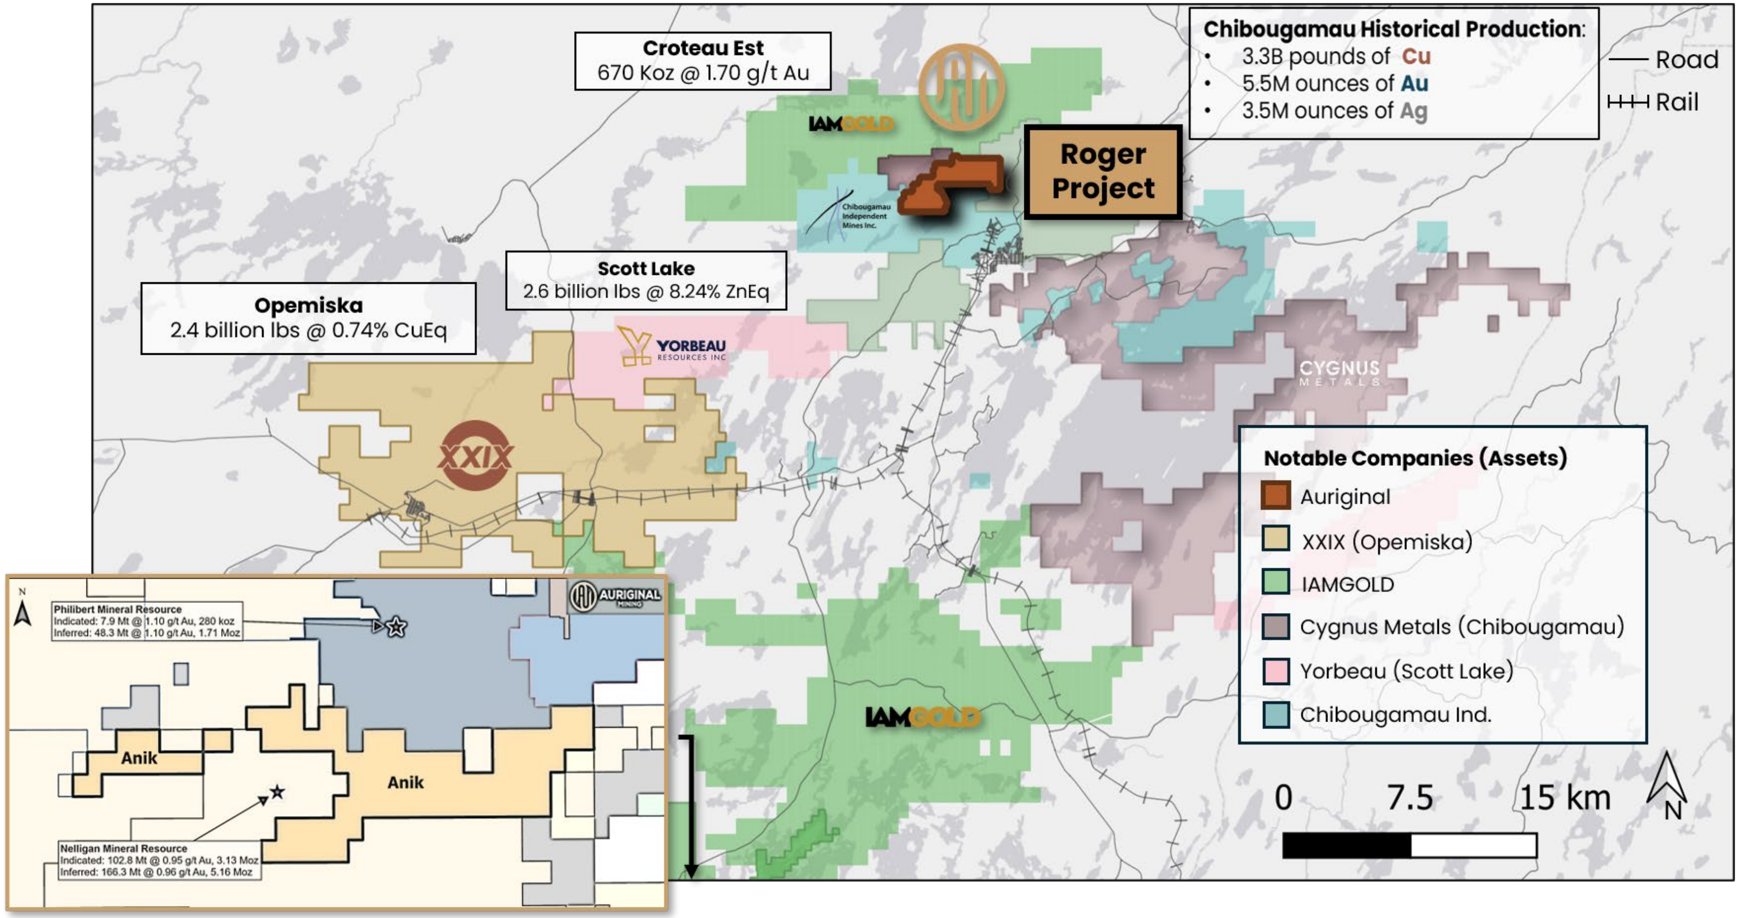
The technical information contained in this presentation has been reviewed and approved by Peter Cashin, who is considered to be a Qualified Person as defined in “National Instrument 43-101, Standards of Disclosure for Mineral Projects.”

INVESTMENT THESIS: Exposure to Strategic Metals Through High-Impact Exploration

- Restructured and tightly held company with strong shareholder alignment and a focused exploration mandate.
- Multiple near-term catalysts, including ongoing drilling at Roger and upcoming results from both Roger and Anik.
- Exposure to copper, zinc and gold—commodities supported by long-term electrification, infrastructure and resource security trends
- Focus on **Roger's** high-grade VMS discovery potential, complemented by **Anik's** proximity to the IAMGOLD's Nelligan gold system

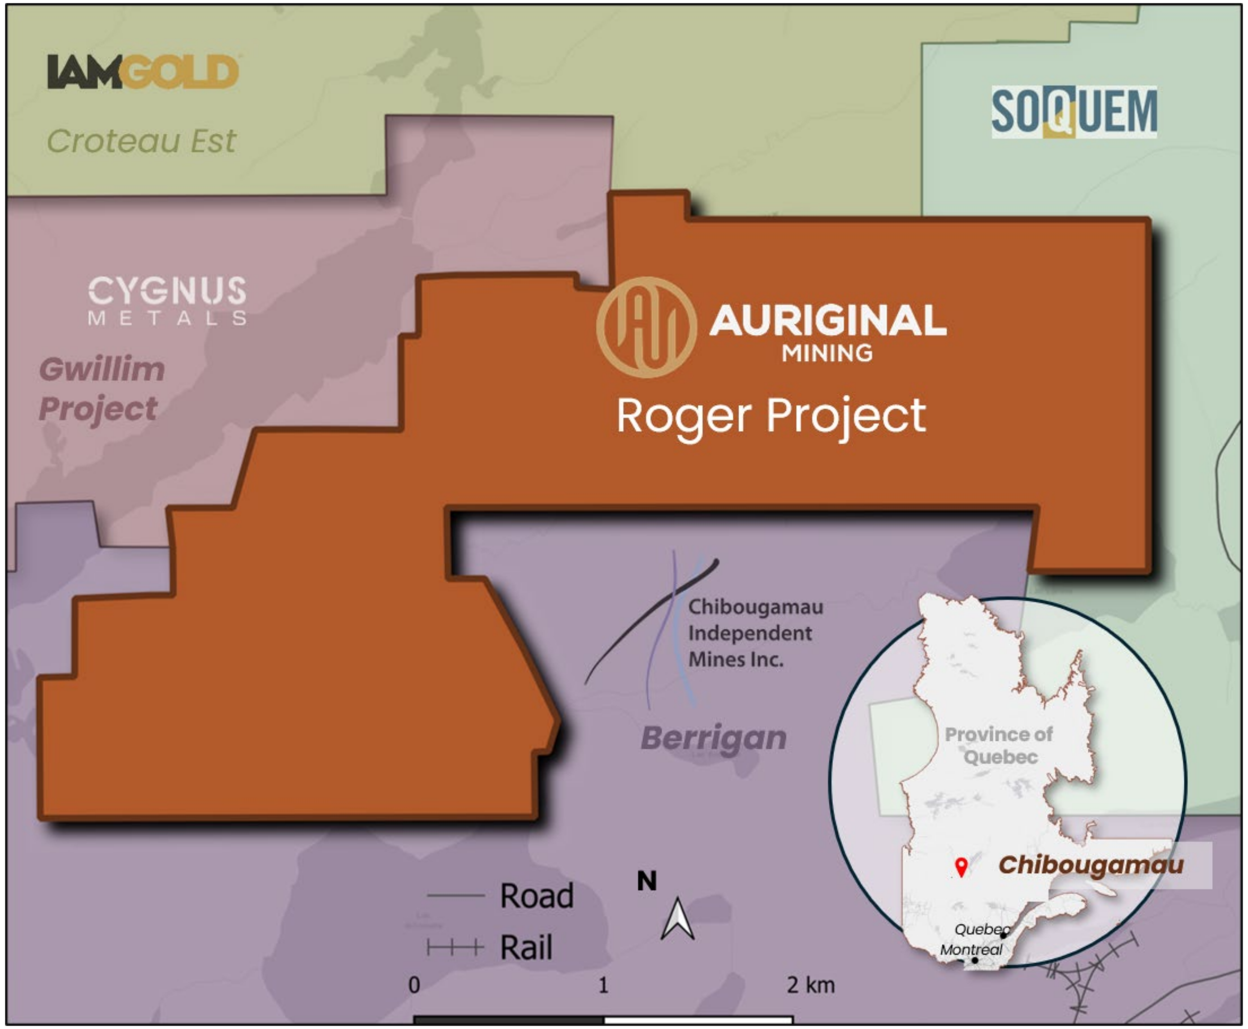
AURIGINAL MINING: District-Scale Copper-Gold Exploration Potential in Quebec

- One of the largest copper and gold exploration portfolios in Quebec, centered in the prolific Chibougamau mining camp.
- **Roger** - Emerging VMS discovery opportunity.
- **Anik -** Project Optionality: JV with IAMGOLD, centered on **10 M oz of gold**.
- Strong balance sheet and supportive shareholders (Orecap, XXIX).



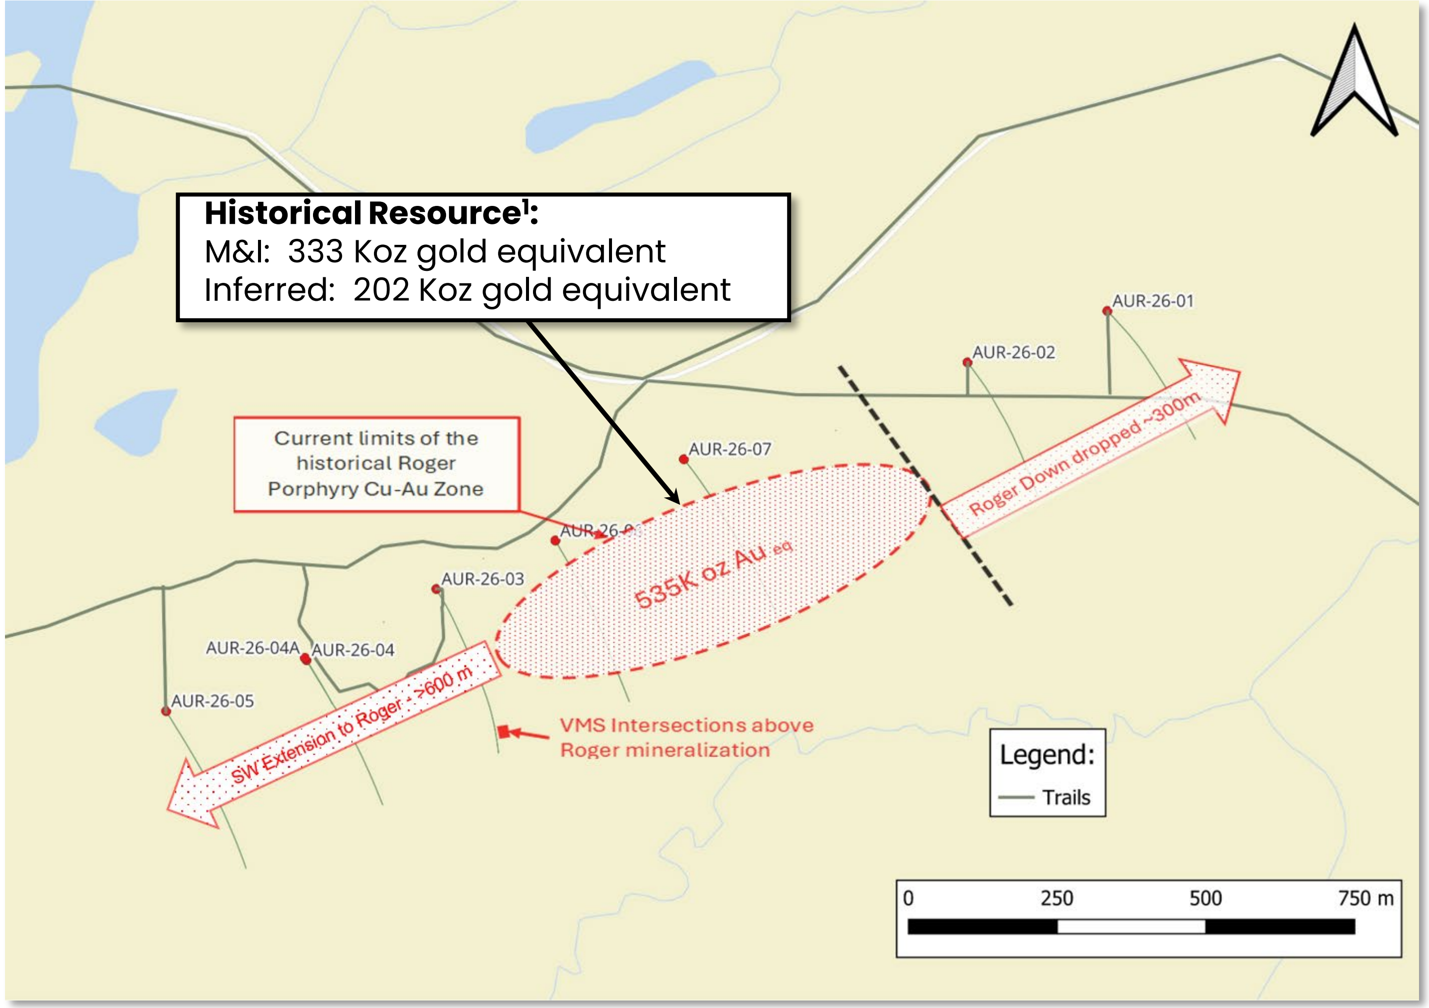
ROGER: A High-Impact Copper-Zinc-Gold Discovery Opportunity

- **Roger Project:** New VMS model supported by strong geological and geophysical evidence.
- High-grade, gold-rich massive sulphide deposit supports new exploration model
- Historical resource of 535 Koz Au_{Eq} (Indicated & Inferred) provides a foundation for value creation.
- Ongoing drilling designed to test district-scale discovery potential
- Potential center of a larger VMS system with significant expansion upside



ROGER: Potential Feeder to a High-Grade VMS System

- High-Value drill results:
  - 7.00% Zn, 0.36% Cu, 1.2 g/t Au, 10.5 g/t Ag over 6.0 m
  - 3.0% Cu, 3.6% Zn, 26.7 g/t Au, 123.5 g/t Ag over 1.2 m
  - 3.93% Cu, 50.0 g/t Ag, 4.6 g/t Au over 3.8 m
- Multiple studies confirm a VMS system (Core resampling, geochemistry, downhole geophysics, age dating of rocks).
- 7,350 metres Phase 1 drill program completed: has confirmed the two-mineralization model.
- All drilling incorporates downhole EM and gravity surveys to identify additional targets.



ROGER: Results for Both Extension of the Roger Cu-Au & VMS Confirmed (JUL 14 & 16)

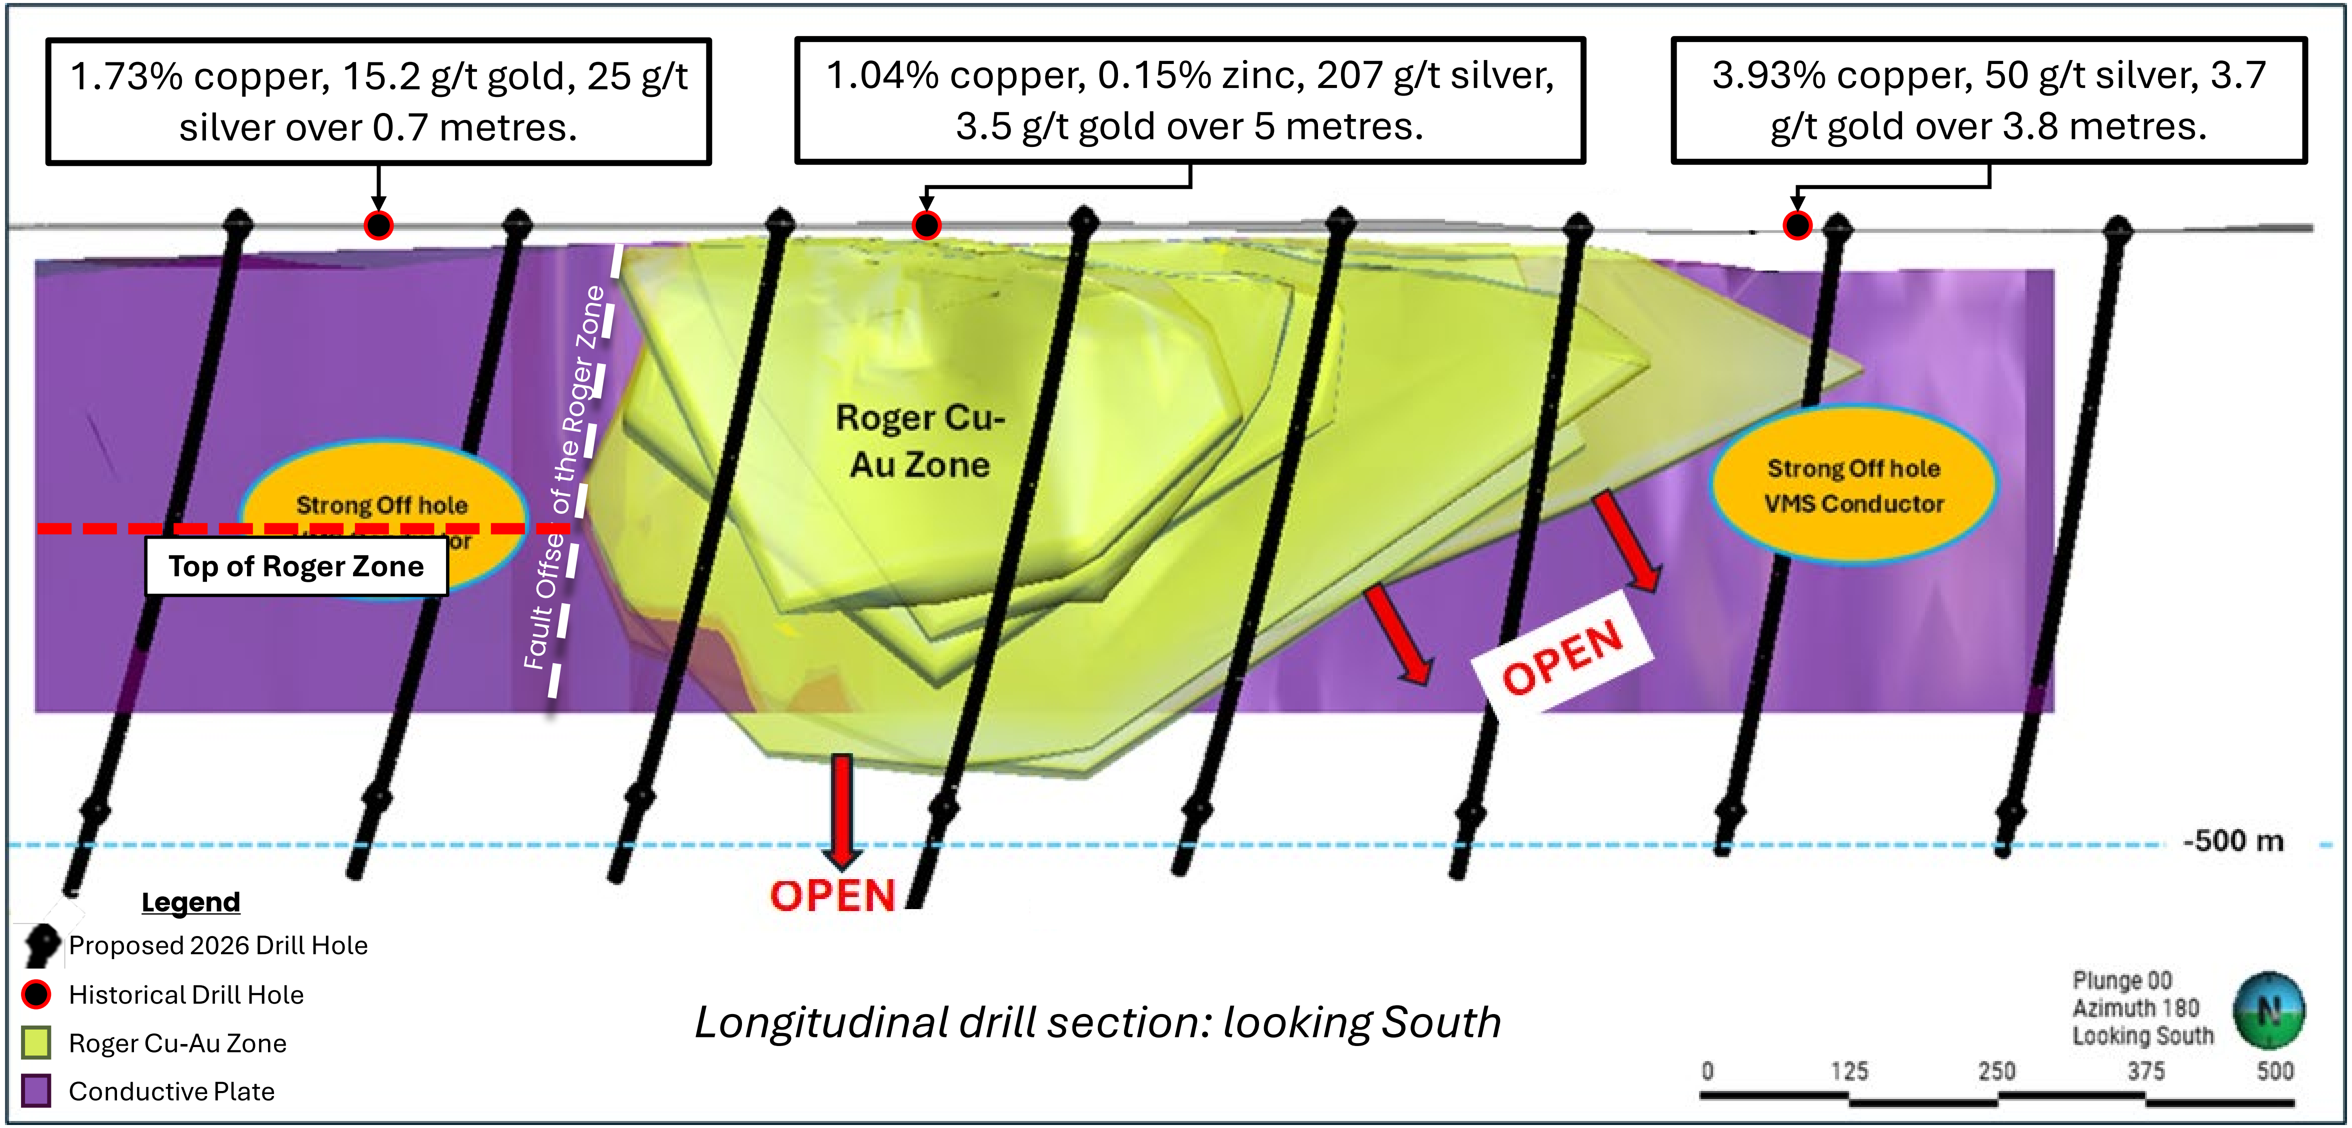
Remaining assays for Hole AUR-26-05 are pending							

ROGER: Current Drilling Targets the Core of a Potential VMS System



ROGER: High-Grade Copper, Zinc, Gold & Silver Mineralization

1.04% Cu, 0.33% Zn, 17.1 g/t Ag over 5.0 m

3.2% Cu, 3.6% Zn, 124.0 g/t Ag, 27.0 g/t Au over 1.2 m

@Spot Pricing = $4,425 USD/t material

Spot pricing at JUL 8, 2026

ROGER PORPHYRY Cu-Au ZONE: Opinion on Historical MRE (2018)

Previous MRE (2018):

- Au price: 1,240$
- Cu price: 2.97$
- Ag price: 16.53$
- Exchange rate: 1.31
- Composites: 1m
- Model:
    - Modeling COG of 0.35g/t AuEq over 10m
    - Remaining material being interpolated unconstrained

Reasonable assumptions for an updated MRE (2026):

- Au price: Likely 3,000-3,500$ (+242% to +282%)
- Cu price: Likely 4.50-5.00$ (+152% to +168%)
- Ag price: Likely 40-45$ (+242% to +272%)
- Exchange rate: 1.35-1.40 (+3% to +7%)
- Composites: Likely wider than 1m
- Model:
    - Modeling COG likely in the 0.05-0.15g/t AuEq range
    - Remaining material being interpolated, but constrained to avoid mixing mineralized material with waste.

ROGER PORPHYRY Cu-Au ZONE: Opinion on Drill Spacing -2018 MRE Cut-Off

ROGER PORPHYRY Cu-Au ZONE: 0.2 g/t Au_{eq} Cut-Off for Revised MRE

Previous MRE (2018):

- Classification:
  - Inferred:
    - Unknown; weirdly not commented in the Technical Report.
  - Indicated:
    - Unknown; weirdly not commented in the Technical Report.

Reasonable assumptions for an updated MRE (2026):

- Classification (for open pit resources only):
  - Inferred:
    - Most likely 150m and maybe up to 200m (TBD) drill spacing for the lower grade porphyry system.
    - Most likely 100m drill spacing for the higher-grade shear zones if still relevant to model
  - Indicated:
    - TBD with model and geostats.

ROGER PORPHYRY Cu-Au ZONE: @ 0.2 g/t Au_{eq} Cut-Off - Potential Resource Expansion

Previous MRE (2018):

- Tonnage: 17,469,000
- Grade: 0.81g/t Au, 0.94g/t Ag, and 0.08% Cu
- Ounces (AuEq): 535,000

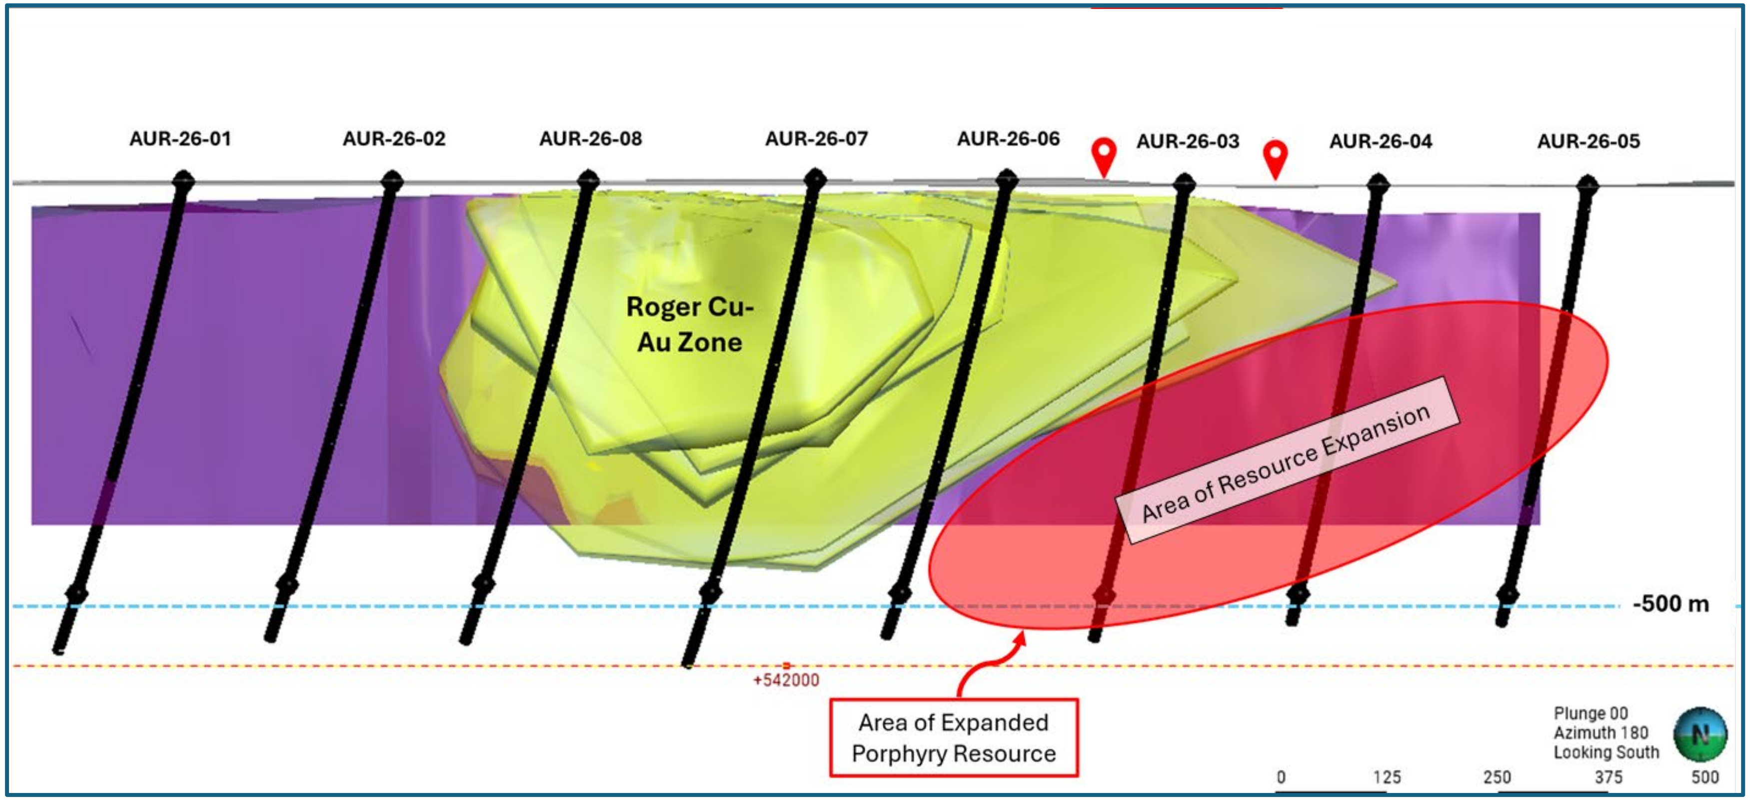
Reasonable assumptions for an updated MRE (2026):

- Tonnage*: Likely higher
- Grade*: Likely lower
- Ounces (AuEq)*: Likely higher

**Given that the 2018 MRE modeling, interpolation parameters, block modeling, and classification are validated.*

ROGER: Phase 2 Drilling Targets the SW Extension of the Roger Cu-Au System

- Drilling from surface to the 500m level near completion.
- Continuity of the VMS horizon has also been confirmed.
- Phase 2 drilling to focus on bringing the SW extension of the porphyry system into Inferred category resource.
- Improved commodity prices since 2018 MRE likely to improve financial and resource model.



Longitudinal drill section: looking South

ROGER: Phase 2 Drilling Plan for SW Extension of the Roger Cu-Au System
